## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 18-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Dickens'948.

See Abstract, figures 1 and 2, column 4, lines 43-57, column 8, lines 38-67, column 10, lines 42-55, column 12, lines 32-47, column 13, lines 35-67, column 14, lines 1-18, column 20, lines 1-12. Dickens'948 discloses a polymer powder for producing a three dimensional object by laser sintering. A polymer powder is compact and not jagged ( see figures 1 and 2). Dickens'948 does not specifically states values of BET, D 0.9 or D0.5, however, it is the examiners position that polymer particles produced in this reference would have the same properties and parameters as claimed because of requirements of the laser sintering.
